

The production of wood pellets is an established renewable industry that is ready to expand and produce significant benefits to the State of Maine.

Wood pellets are a refined product made from low grade pulp and wood waste.

Wood pellets for heat does not require any new technological breakthroughs.

Maine is one of the most heavily forested states in the nation. It is a resource that is available for immediate use.

The simple answer is often overlooked as it is not that bright shiny object.

Wood for heat in modern pellet boilers and furnaces:

- 85% efficient

Wood for heat in modern pellet boilers and furnaces:

- 85% efficient
- Up to 93% efficient in condensing boiler

Wood for heat in modern pellet boilers and furnaces:

- 85% efficient
- Up to 93% efficient in condensing boiler
- 2 million tons or more of low-grade softwood available for pellets

Wood for heat in modern pellet boilers and furnaces:

- 85% efficient
- Up to 93% efficient in condensing boiler
- 2 million tons of low-grade softwood are available for annual renewable harvest
- 1.5 million tons of biomass grade

Wood for heat in modern pellet boilers and furnaces:

- 85% efficient
- Up to 93% efficient in condensing boiler
- 2 million tons of low-grade softwood available for pellets
- 1.5 million tons of biomass grade
- Spruce Budworm harvest coming again

Wood for heat in modern pellet boilers and furnaces:

- 85% efficient
- Up to 93% efficient in condensing boiler
- 2 million tons of low-grade softwood available for pellets
- 1.5 million tons of biomass grade
- Spruce Budworm harvest coming again
- Softwood BTUs 8,200 vs. Hardwood BTUs 7,900

Wood for heat in modern pellet boilers and furnaces:

- 85% efficient
- Up to 93% efficient in condensing boiler
- 2 million tons of low-grade softwood available for pellets
- 1.5 million tons of biomass grade
- Spruce Budworm harvest coming again
- Softwood BTU 8,200 vs. Hardwood BTU 7,900
- 100% renewable

Wood for heat in modern pellet boilers and furnaces:

- 85% efficient
- Up to 93% efficient in condensing boiler
- 2 million tons of low-grade softwood available for pellets
- 1.5 million tons of biomass grade
- Spruce Budworm harvest coming again
- Softwood BTU 8,200 vs. Hardwood BTU 7,900
- 100% renewable
- Home grown economy

Value to Maine economy if we used 1 million tons for home and small business heating:

1 million raw tons = 500,000 tons pellets x \$265 / ton

Value to Maine economy if we used 1 million tons for home and small business heating:

1 million raw tons = 500,000 tons pellets x \$265 / ton
= \$132,500,000 (91%+ stay in Maine)

Value to Maine economy if we used 1 million tons for home and small business heating:

1 million raw tons = 500,000 tons pellets x \$265 / ton
= \$132,500,000 (91%+ stay in Maine)
\$120,575,000 x 2.5 = \$301,437,500

Value to Maine economy if we used 1 million tons for home and small business heating:

1 million raw tons = 500,000 tons pellets x \$265 / ton
= \$132,500,000 (91%+ stay in Maine)
\$120,575,000 x 2.5 = \$301,437,500
x 10 years

Value to Maine economy if we used 1 million tons for home and small business heating:

$$\begin{aligned} 1 \text{ million raw tons} &= 500,000 \text{ tons pellets} \times \$265 / \text{ton} \\ &= \$132,500,000 \text{ (91\%+ stay in Maine)} \\ &\$120,575,000 \times 2.5 = \$301,437,500 \\ &\quad \times 10 \text{ years} \\ &= \mathbf{\$3,014,375,000} \end{aligned}$$

Value to Maine economy if we used 1 million tons for home and small business heating:

$$\begin{aligned} 1 \text{ million raw tons} &= 500,000 \text{ tons pellets} \times \$265 / \text{ton} \\ &= \$132,500,000 \text{ (91\%+ stay in Maine)} \\ &\quad \$120,575,000 \times 2.5 = \$301,437,500 \\ &\quad \quad \times 10 \text{ years} \\ &= \$3,014,375,000 \end{aligned}$$

Value to Maine Commerce
\$301,437,500

Value to Maine economy if we used 1 million tons for home and small business heating:

**Reduction in Export Dollars
\$100,000,000 / year (6,000 jobs)**

Wood pellet heating is an established business and ready to expand.

All it needs is to be accepted **and** embraced.

Thank you for attention.
